Microsoft Exchange Server Roles	Microsoft Exchange Edge Transport Role
Microsoft .Net Framework	Microsoft .Net Framework 3.5 SP1 and above. (Exchange 2010) **Microsoft .Net Framework 4.5 (Exchange 2013 & 2016)**

Downloading
Please refer to the following link on the Exclaimer website:
http://www.exclaimer.com/address-tagging-for-exchange/download

Installing
Download the 'Address Tagging 1.0.1' installation file 'setup.exe' and run it. An MSI is available from support by contacting support@exclaimer.com.

Uninstalling
Uninstall can be achieved via the 'setup.exe' or MSI for the currently installed version or via 'Programs and Features' in Windows Server 2008 and above.

Fixed Issues
- Blocked addresses were case sensitive.

Changes and Enhancements
- Removed licensing. Address tagging for Exchange is now a free product.

The uninstall process will not lose any of your configuration or settings. However as a backup precaution you may wish to export your configuration.

Export Steps

1. Open the Exclaimer Console
2. Select the 'Exclaimer' node
3. Open the 'Action' menu
4. Select 'Export Configuration...'
5. Select a location and filename for the export
6. Press Save

This will export all your settings including all your sender/recipient lists and licensing data.

Upgrading

Upgrading can be achieved by following the steps above to uninstall the current version and then install the new version. It is recommended to stop the Microsoft Exchange Transport service once Exclaimer Anti-spam has been uninstalled to prevent message delivery without Anti-spam protection. The installation of a new version of Exclaimer Anti-spam will start the Microsoft Exchange Transport service.

Enhancements

- Maintenance release updating license and copyright information.
- Support for Microsoft .NET Framework 4.7.1 and .NET security updates.
