Downloading

Please refer to the following link on the Exclaimer website:

<http://www.exclaimer.com/template-editor/download>

Installing

Download and run the 'Template Editor 2.0 installation file 'setup.exe'. An MSI is available from support by contacting support@exclaimer.com.

Uninstalling

Uninstall can be achieved via the 'setup.exe' or MSI for the currently installed version of 'Template Editor 2.0' or 'Programs and Features' in Windows 2008, Windows 2012, Windows 7, Windows 8 and Windows 10.

The configuration files are located in "\\Users\username\AppData\Local\Exclaimer Ltd\Template Editor" and will not be removed as part of the uninstall process.

The uninstall process will not lose any of your configuration or settings.

Upgrading

Upgrading can be achieved via the 'setup.exe' which will perform an in-place upgrade.

Fixed Issues

- Adding content before opening HTML tag causes inescapable errors.

Enhancements

- Maintenance release updating license information.
- Support for Microsoft .NET Framework 4.7.1 and .NET security updates.
- Windows 10 support.
- Support for newer versions of Exclaimer Signature Manager Exchange Edition, Exclaimer Signature Manager Outlook Edition and Exclaimer Auto Responder.

Known Issues

- Uninstall fails when using Apps & Features panel in Windows 10. This is a confirmed bug in Windows 10 resolved in the Fall Creators Update 1709. For earlier versions of Windows 10 use Add/Remove Programs via Control Panel.
- Moving templates between categories in an Exclaimer server-side product does not reflect the change in Template Editor. As a workaround edit the template in the original category when using Template Editor. This will be addressed in a future version of the Exclaimer server-side products.
